Hospitality - **Z3C Model**

Self-Service for Hospitality

CREATE CONVENIENT LIFE

21.5-inch / optional 27-inch
Windows

A compact self-service platform for restaurants, cafés and hospitality venues, with 21.5-inch and optional 27-inch touchscreen configurations, integrated printing and barcode scanning.

Performance for Daily Service

Choose from Intel Celeron, Core i3 or Core i5 processor options to suit your application. Flexible memory and storage configurations support your selected hospitality software. Integrated printing and scanning modules keep essential hardware together in one guest-facing unit.

Flexible Deployment

Build the setup around your venue and service concept. Windows and Linux options provide a platform for compatible self-service applications. The payment device bracket supports a range of EMV terminals, subject to the selected device and integration.

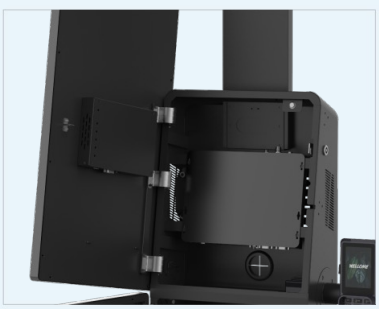

Compact Countertop Design

Use available counter space efficiently with a compact kiosk format. The configuration shown has no toplight, creating a lower profile for guest-facing areas. A modular construction brings the display, scanner and printer together in a tidy installation.

Responsive Touchscreen

Choose a 21.5-inch touchscreen or the optional 27-inch display to suit your venue. The 21.5-inch model features Full HD resolution, true-flat PCAP multi-touch and a fully laminated display for clear guest interaction.
